

1 opening [of angle of] said half-spherical structure is aligned approximately 5 degrees
2 forward and approximately 33 degrees behind [the shaft's] said longitudinal axis of
3 said shaft.

4 (Once Amended) A method of playing the game of fetch, including the following
5 steps:

- 6 a. selecting an elongated shaft with opposite distal end proximal ends and having
7 a ball engaging means disposed at [its] said distal end, said ball engaging
8 means capable of engaging a ball without the aid of one's hands or fingers and
9 capable of releasing a ball when said shaft is swung;
- 10 b. holding the proximal end of said shaft;
- 11 c. attaching a ball to said ball engaging means while holding said proximal end
12 of said shaft; and
- 13 d. sufficiently swinging said shaft while holding said proximal end thereby
14 causing said ball to be released from said ball engaging means.

15 **REMARKS**

16 Upon further review, typographic and Section 112, second paragraph errors were
17 found in Claims 1, 4 and 5 which are hereby corrected.

18 No new matter is being introduced by these changes.

19 Respectfully submitted,

20
21 DEAN A. CRAINE
